

## Allocation board months study associations ESE 2026-2028

Each year, the boards of our study associations receive grants, also known as board months. The total number of board months that ESE can divide among its study associations is determined every three years by the Executive Board based on student numbers. This period, ESE received 231 board months. In addition, ESE also subsidizes a number of board months itself. Each study association receives a number of base board months, which is mainly based on the number of students in the programmes / specialisations affiliated with the study association. In addition, study associations had the opportunity to earn bonus board months. To do so, they had to determine and work towards a number of diversity and impact goals.

### Base board months

The boards of ESE's faculty associations EFR and FAECTOR receive respectively 96 and 52 board months. FAECTOR receives a number of board months for its bachelor's students that is in proportion to EFR on the basis of the student numbers in the bachelor programmes (based on the moving three-year average). The remaining board months are in principle allocated based on the mutual ratio of the moving average of enrolled students in each programme in years t-3, t-2, and t-1. In addition, the minimum number of board months a study association receives is 6 and the maximum is 30. The minimum of 6 board months does not apply to the master study boards of EFR.

### Bonus board months

We make bonus board months available to the study associations that meet a set of goals in the area of diversity and impact. As the study associations vary considerably in size, scope and their current progress in the areas of diversity and impact, each association has determined its own set of goals. Based on the size of the study association and its progress on the defined goals, a number of bonus board months has been awarded.

The allocation of the board months is as follows:

	<b>Base board months</b>	<b>Bonus board months</b>	<b>Total # board months</b>
EFR - General board	96	4	100
EFR - Master Study Board Behavioural Economics	6		6
EFR - Master Study Board Strategy Economics	4		4
FAECTOR	52	4	56
FSR	30	3	33
Aeclipse	11	2	13
MAEUR	11	1	12
Christiaanse Taxateur	6	2	8
Transito	6	1	7
In Duplo	11	2	13
<b>Total</b>	<b>233</b>	<b>19</b>	<b>252</b>
