

Healthy Start, the Best Future

Early life is a smart investment

Source: James Heckman, Nobel Laureate in Economics

Major scientific and societal challenges

- Enormous health disparities from early life onwards
- Challenging living environment
- Loss of talent and opportunities
- Unused potential for prevention strategies promoting a healthy start

- Early-life biological programming of health, disease and wellbeing
- Interaction of genetic susceptibility and family and living environment
- Organ development from conception to adulthood
- Advanced analyses of large population and patient data

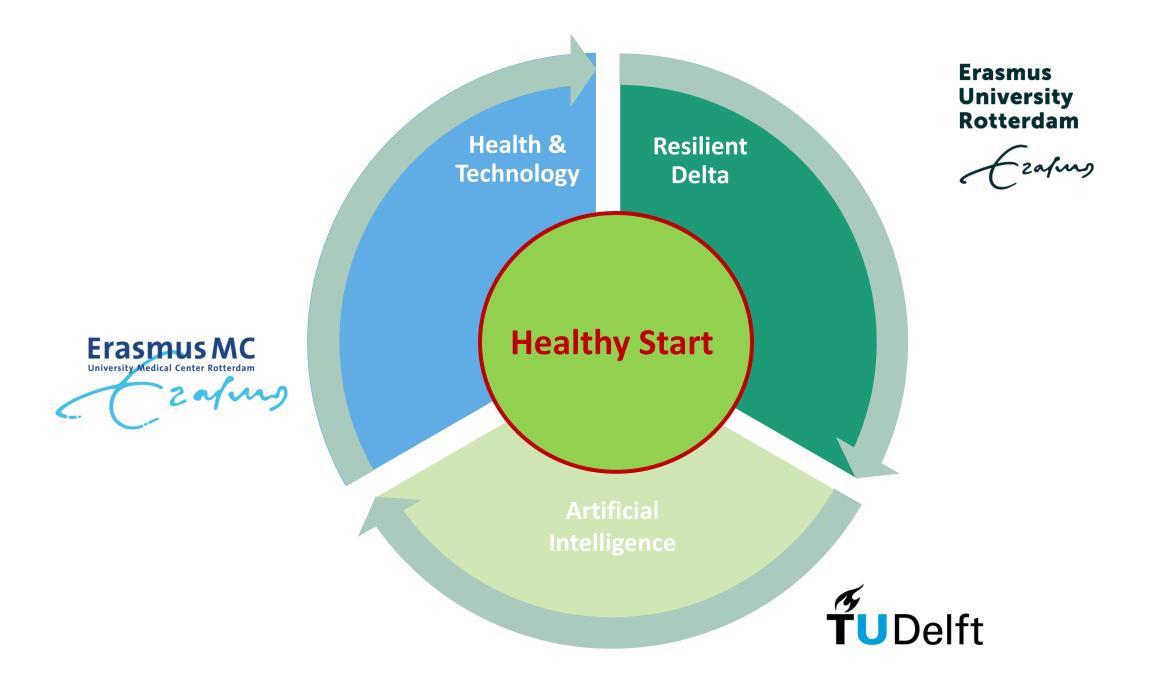

Convergence creates ideal environment for innovative approaches to address these urgent challenges

Unique opportunity for Rotterdam-Delft Region

Optimize developmental opportunities for new generations by using innovative medical, social, behavioral and technical approaches

- Great potential for world leading research by multidisciplinary approaches
- Top research groups (>10 ERC grants)
- World class infrastructures (Generation R, Healthy Pregnancy 4 All, SYNC Labs, ODDISSEI)
- Research from cells to populations
- Medical, social, psychological and technical sciences
- Strong collaborations with local and national government
- Sophia Children's Hospital as unique world class
- Biomedical sciences

Network for great research with impact

- Network for innovative research across research infrastructures
- Attract and stimulate talents to work in this region
- Attractive for funding
- Seminars and courses for healthy start researchers
- Bottom up, inclusive and not restrictive

Working group: Eveline Crone, Arie Franx, Vincent Jaddoe, Renske Keizer, Maaike Kleinsmann, Maarten Kroesen, Irwin Reiss

Eveline Crone Erasmus University

Maaike Kleinsmann TU Delft

Vincent Jaddoe Erasmus University Medical Center

Kick off, June 15th

Aims

- Know each other
- Starting point of network
- Collecting ideas for creating scientific and social impact
- Follow up meeting in October

Program kick off, June 15th

10.00 10.10	Introduction Pitches scientific showcases by prof. Irwin Reis, prof. Renske Keizer and prof. Moniek Buijzen
10.30	Breakout rooms to assess next steps and central question: "how can we best let Healthy Start flourish within the 3 organizations of EUR, TUD, Erasmus MC?"
10.50	3 Pitches societal impact by postdocs/PhD's and Prof. Manon Hillegers
11.15	Plenary Q&A
11.25	Closing
11.30	End
