

UNIC4ER

APPENDIX Local Engaged Research Roadmaps

Co-funded by the  
Erasmus+ Programme  
of the European Union

Horizon 2020  
European Union funding  
for Research & Innovation

## 4.2 Local Engaged Research Roadmaps

UNIC4ER aim is to engage trans-disciplinary RDI projects that include cities as partners. Hence, UNIC4ER Meets the City framework specifies Local Engaged Research Roadmaps, based on or inspired by which collaborative UNIC Engaged Research projects will be called for.

To meet the cities, UNIC4ER has collected our UNIC Cities' priorities for Engaged Research. 1) UNIC WP5 CityLabs Roadmaps' input was transferred into the Urban Agenda for the EU framework, and 2) UNIC City organisations' Top 10 Engaged Research challenges were defined (Engaged Research Strategy Forum 2, by UNIC Cities) (Table 1.).

The defined Engaged Research challenges are based on our cities' objectives and challenges that are in constant change. Also new needs will emerge, and on the other hand, Engaged Research needs will become fulfilled. Hence, UNIC4ER creates Local Engaged Research Roadmaps that are meant to be regularly updated.

**Table 1. Local Engaged Research Roadmaps (August 16<sup>th</sup> 2022) imply UNIC Cities' shared interests.**

Local Engaged Research Roadmaps 16/8/2022							
Rotterdam	Istanbul	Bochum	Cork	Bilbao	Liège	Oulu	Zagreb
Promoting social cohesion and participation in neighbourhoods with high degree of residential mobility	Building resilience	Sustainable city & urban development	Compact growth	Improving the environmental sustainability of the city (mobility and zero emissions, climate change, green ring and BNS...)	Diversity and inclusion: Ensuring the continuity and development of inclusion and diversity policies/practices for immigrant newcomers and refugees	Becoming most enterprise friendly international growth center	Poverty risk
Fighting drug crime, international trafficking networks	Social cohesion and co-habitation	Integration and cultural diversity	Enhanced regional accessibility	Keep on providing quality services that cover all neighbourhood	Transition: Supporting the city's transition process through engaged research and innovation projects	Strengthening the attraction and traction	Reintegration of NEFTs
Breaking the cycle of intergenerational poverty, health problems and	Local democracy and participatory city management	Smart city & Digitalization of administration and society	Strengthened rural economies and communities	An increasingly socially cohesive city (aging, young people, migrants,	Housing: Eradicating homelessness by improving data quality and by	Carbon neutrality	Lack of affordable housing

low education				universal accessibility, homeless...)	shifting the paradigm towards the housing first/housing led approach, fostering an equal access to housing, particularly for vulnerable groups		
New economic models and labour market/life long learning opportunities	Circular city	Sustainable, barrier-free and smart mobility	Sustainable mobility	To continue developing a city that is even more attractive for investment and employment generation (economies of added value, CCI, economies of proximity, care economies...)	Engagement: Developing and stimulating citizen participation and engagement, towards a more participatory and collaborative city	Everyone has the opportunity to live a healthy and secure life	Urban mobility
Modern governance structures with (semi)-private partners, societal organizations and citizen initiatives	Heavy traffic, public transport and micro-mobility	Internationalization & international networking	A strong economy, supported by enterprise, innovation and skills	Continue working on the value-based city, especially equality between women and men.	Social economy: Developing innovative plans to support social economy and solidarity, and fostering an equal and inclusive access to the labor market	Education builds a sustainable and international Oulu	Brownfield Development
Creating innovative housing models	Social solidarity and sustainable social support		High-quality international connectivity	City collaborative and participatory governance model.		Impactful services, sustainable economy and well-feeling personnel	Sustainable Waste Management
Climate change adaptation and the Inclusion of vulnerable groups in the transition towards sustai	Participation of youngsters in decision making		Encanched amenity and heritage			Taking advantage of the digitalization opportunities	Urban renewal of the historic center

16 | D4.2 Design of the UNIC4ER Meets the City framework for supporting the cocreation of engaged research on post-industrial transitions

nability							
Upholding public values in the realm of digitalization and artificial intelligence	Design for public good		Transition to low carbon and climate resilient society				Green infrastructure and nature based solutions for climate change adaptation
Understanding everyday experiences of unsafety, and develop policies fighting it	Strengthening Creative sectors		Sustainable management of water and other environmental resources				Energy transition
Preventing isolation and radicalization	Boosting innovation and entrepreneurship		Access to quality childcare, education and health services				Safe and comfortable public spaces

With the reference to the roles of cities and municipalities in service and infrastructure development and participation process facilitation, linkages to political decision making, as well as to versatile background studies conducted for public policy and plan making, more detailed information on the objectives were collected (Engaged Research Strategy Forum 2, by UNIC4ER TF + UNIC Cities) (Tables 3-10.).

These documents justify each UNIC city's Engaged Research challenges and provide timely background information for Engaged Researchers looking for shared interests.

**Table 2. Rotterdam: Local Engaged Research Roadmap (16/8/2022) justification and background.**

Engaged Research challenge	Policy document	URL
<b>1 Sustainable city &amp; urban development</b>  Climate protection as a central task for environmental protection	„sustainability strategy“ (in progress until the end of 2022)  • 100% climate-neutral by 2035 ("climate-friendly level" of greenhouse gases per capita (less than 2 t CO <sub>2</sub> /inhabitant annually (for comparison Ø federal government: 11 t CO <sub>2</sub> /inhabitant)) • 100% renewable by 2035 • Expansion of solar and greening projects • Creation of a sustainability database • Strengthening of sustainable educational offers	<a href="https://www.bochum.de/C125830C0042AB74/vwContentByKey/W2C93BF9207BOCMDE/\$File/Datenbank_Klima_oeffentlich.pdf">https://www.bochum.de/C125830C0042AB74/vwContentByKey/W2C93BF9207BOCMDE/\$File/Datenbank_Klima_oeffentlich.pdf</a>  <a href="https://www.bochum.de/C125830C0042AB74/vwContentByKey/W2CAUAZL631BOCMDE/\$File/KlimaCheck_gesamt.pdf">https://www.bochum.de/C125830C0042AB74/vwContentByKey/W2CAUAZL631BOCMDE/\$File/KlimaCheck_gesamt.pdf</a>
Effective climate change		

adaptation to secure the natural basis of life for everyone

- Strategies to protect against the consequences of the climate crisis such as heat, floods or heavy rain events
- Climate-resilient & climate-adapted city (keyword "Bochum as a climate-neutral, renewable sponge city")

Development of a sustainability strategy and implementation of the UN Sustainable Development Goals (SDGs)

## 2 Integration and cultural diversity

Equal access for all Bochum residents to the city's offers and services

Empowerment of all people living here to social, cultural and social participation

Anchoring of a culture of "diversity" in city administration and administrative processes

- Make integration more visible
- Open the city administration interculturally
- Combat racism and discrimination

[https://www.bochum.de/C125830C0042AB74/vwContentByKey/W2BPRGSB225BOCMDE/\\$FILE/Integrationskonzept.pdf](https://www.bochum.de/C125830C0042AB74/vwContentByKey/W2BPRGSB225BOCMDE/$FILE/Integrationskonzept.pdf)

## 3 Smart City & Digitalization of administration and society

Development of a municipal smart city data platform

Concept for Smart City Bochum

[https://www.bochum.de/C125830C0042AB74/vwContentByKey/W2BZFCML310BOCMDE/\\$File/SmartCityBochumKonzept.pdf](https://www.bochum.de/C125830C0042AB74/vwContentByKey/W2BZFCML310BOCMDE/$File/SmartCityBochumKonzept.pdf)

Digital urban society:

- Introduction of digital participation instruments
- Social and societal participation through digital equipment --> digital inclusion

Intelligent city management:

- Development of intelligent sensors in the urban area --> digital technologies to make Bochum cleaner, safer and more livable

**4 Sustainable, barrier-free and smart mobility**

Mobility concept of the city of Bochum

<https://www.bochum.de/mobilitaetskonzept>

Strengthening of local public transport and cycling as sustainable alternatives for mobility. The aim: to create optimal framework conditions to strengthen the environmental association and to make the switch from cars to buses, trains and bicycles attractive.

- Expansion of the Bochum cycle paths and development of a cycle traffic concept (<https://www.bochum.de/Tiefbauamt/Radverkehrskonzept>)
- Expansion of the route network
- Improving the parking and commuting situation
- E-mobility

**5 Internationalization & international networking**

In progress

Development of a municipal

internationalization strategy

- Elimination of language barriers within the city administration
- Strengthening of global networking between city administration and local companies
- Linking international activities with the UN Sustainable Development Goals (SDGs)
- Strengthening of existing town partnerships through specific project work
- Development of an international urban society
- Creation of an international welcome culture for international students, for example

**Table 5. Cork:** Local Engaged Research Roadmap (16/8/2022) justification and background.

Irish model is highly centralized with a large dependence on Central Government resourcing and direction which tends to be multi-agency nationally and national government agency led at the local level (not city led). However, at the local level the Irish model is highly consultative and participatory (each city has a Local Community Development Committee and Public Participation Networks etc).

The ten challenges are drawn from the City Development Plan which is one document among others that frame city priorities. The development plan is connected to the national development plan, and very much centered around physical infrastructure urban planning and not social planning. However, information on priorities from the LECP has also been included.

### 3 Eradicate homelessness by improving data quality and by shifting the paradigm towards the Housing first/housing led approach

The City of Liège has engaged in the URBACT roof project to design, implement and evaluate an integrated action plan that aims to eradicate homelessness by improving data quality and by shifting the paradigm towards the Housing first/housing led approach.

The objective of this paper is to define the structure of the future integrated action plan. It will identify concrete actions and those responsible for their design and implementation.

The document has been drawn up on the basis of the URBACT Guidelines for co-producing an integrated action plan (may 2020).

The result is the *design of a housing pathway for the homeless people*. It is structured around new mechanisms: the one-stop shop, funding for new support professions, the creation of an observatory, the housing taskforce and new ways of accessing housing.

### 4 Towards a more participatory and collaborative city

<https://www.liege2025.be/>

- The City of Liège has decided to create a new Direction for Citizen Participation. The challenge is to design and implement a new model of citizen participation that is

more inclusive and transversal.

**Table 8. Oulu: Local Engaged Research Roadmap (16/8/2022) justification and background.**

The municipalities represent the local level of administration in Finland and act as the fundamental, self-governing administrative units of the country. Municipalities have the right to levy a flat percentual income tax and they provide two thirds of public services. The municipalities organise services for their residents. Most of these services are defined by law as being duties of local government. Local government's statutory duties cover the following:

- Education and early childhood education and care
- Cultural, youth, library and sports services
- Urban planning and land use
- Water and waste management
- Environmental services
- Health and social services (will be transferred to the counties as part of the health and social services reform)
- Fire and rescue services (will be transferred to the counties as part of the rescue services reform)

In addition to the statutory duties, the municipalities may assume other tasks of self-government themselves. These generally concern the economy, employment and housing. The municipalities have a key role in organizing local citizen participation.
