

Minor

Erasmus MC
Universitair Medisch Centrum Rotterdam

Planetary Health

Health Equity in a Changing World

About this minor

In the light of the ecological breakdown, this minor will inspire and equip you with knowledge and skills to promote health, reduce health disparities, and advocate for sustainable healthcare practices.

Develop the interdisciplinary and transdisciplinary skills to address the impacts of climate change, biodiversity loss, and pollution on health and health inequalities!

In this minor

Module A – An interdisciplinary planetary health project

Interdisciplinary project work on a Planetary Health topic of your own choice

Week overview:

1. Introduction: Planetary Health
2. The Environmental Impact of Healthcare
3. One Health
4. Food & Health
5. Nature & Health
6. Origins of the crisis
7. Environmental Justice
8. Environmental Politics and Health
9. Transformations for Health

Module B - A civically engaged planetary health project

Transdisciplinary project work in a real world setting, in collaboration with commissioning organizations

Team

Floor Haalboom
Coordinator

Anouk Nusselder
