Creating your Google Scholar Citations Profile

A Google Scholar Citations Profile helps you to keep track of citations to your articles, based on Google Scholar. This includes the citing publications, and several citation metrics.

The citation universe of Google Scholar is bigger than Web of Science or Scopus – more sources are covered. The number of publications and the number of citations found in Google Scholar will therefore be higher than the numbers in Web of Science or Scopus and this will result in a higher H-index.

Creating your Google Scholar Citations Profile

- Go to Google Scholar (http://scholar.google.com/)
- Open the link My Citations at the top of the screen.
- You are asked to login. You can use an existing Google account, or create a new Google account.
- The Citations sign up form will ask you to confirm the spelling of your name, and to enter your affiliation, interests, etc. Google Scholar recommends that you also enter your university email address which will make your profile eligible for inclusion in Google Scholar search results.
- On the next page, you’ll see groups of articles written by people with names similar to yours. Click Add all articles next to each article group that is indeed yours, or click all articles to add specific articles from that group. If you don’t see your articles in these groups, click Search articles to do a regular Google Scholar search, and then add your articles one at a time. Feel free to do as many searches as you like.
- Once you’re done with adding articles, you will be asked what to do when the article data changes in Google Scholar. You can either have the updates applied to your profile automatically, or you can choose to review them beforehand. In either case, you can always go to your profile and make changes by hand.
- Finally, you will see your profile. This is a good time to add a few finishing touches - upload your professional looking photo, visit your university email inbox and click on the verification link, double check the list of articles, and, once you’re completely satisfied, make your profile public.

If you add your university email address to your profile and if you make your profile public, it will appear in Google Scholar results when someone searches for your name.

User profiles for Irene van Staveren
Irene van Staveren
Professor of Pluralist Development Economics, Institute of Social Studies, Erasmus ... 
Verified email at ias.nl
Cited by 1949

Example of how your profile appears in Google Scholar search results
In Google Scholar, your name under a title will become a link. This will guide Google Scholar users to your Google Scholar Citations Profile.
