Quickstart: connecting to the Eduroam network

To add a connection to the Eduroam network:
- Click on the network icon, select the Eduroam network and click on connect. Enter your full ErNA credentials (including @eur.nl) and accept your certificate.

Using Eduroam network connection:
- Based on the preference Auto reconnect your device will auto reconnect when your device is in reach of the Eduroam network.

Step-By-Step: Connecting to the Eduroam network

1.1. View the available Wifi networks and select Eduroam

Click with the left mouse button on the network icon in the bottom right corner of the Windows Taskbar to view the available Wi-Fi networks.

Select the Eduroam network and click:

   connect

Tip: make sure the option Connect automatically is selected. The next time using and in reach of the WiFi Eduroam network your device will auto connect.
1.2. Fill in your ErNA-id account details and accept security certificate

Fill in the required fields. Enter your ErNA-Id here, like ErNA-id@eur.nl and password, click OK to continue.

The next step is to accept the certificate. Click on connect to finalize your connection.

1.3. Connected to the Eduroam Network

You are now connected to the Eduroam WiFi network.

Using the Eduroam Wifi connection

Based on the preference Auto reconnect your device will auto reconnect. See 1.1 when connect to it manually. The same panel in 1.1 gives you the option to disconnect.
