Installing a VPN connection in Windows 7

This document explains the creation of a VPN connection to the Erasmus University network, on a PC with Windows 7. We assume the user has a connection to the Internet via a modem, ISDN, ADSL or cable connection. Also the user needs to have enough rights to create and configure such a VPN connection on the PC.

1. Open Control Panel->Network and Internet->Network and Share Center. Click Set up a new connection or network.
2. Select **Connect to a workplace** and click **Next**.
3. Select **Use my internet connection (VPN)**.
4. Fill in the server name: `vpn-eur-pptp.eur.nl` and your connection name under the Destination name field.
5. Enter your ERNA user name and password that has been granted access to the host computer.
6. Then click Connect.
