Instructions for setting up a VPN connection on your Mac (Operating System 10.5 also known as ‘Leopard’)

Open “System Preferences” by clicking the apple in the top left corner and selecting ‘System preferences’.
Click on the 'Network'- icon
Click on the ‘+’ sign in the left corner.
Select VPN and PPTP. You might want to consider naming the connection ‘VPN EUR’
Fill in the server address like below.
The account name, of course, has to replaced by your personal ERNA-name.
Press the button <Authentication settings> and fill in your ERNA password.
Press the <Advanced> button and check the box adjacent to <Send all traffic over VPN connection>
Connect to the Internet and choose in the top of your screen for CONNECT VPN
