1. Introduction

This manual contains the most important information that is necessary to add and modify a publication for upload to Repub. This manual covers the most important functionalities. Minor modifications that EUR will start to use immediately are also addressed. These include the extensions of the publication type *dataset* and the option to relate publications to each other. Finally, this manual describes the custom functionality to add a research program at a publication.

7. Uploading to RePub

In the framework of the <u>open access policy</u>, after registering your publication in Personal Metis it is compulsory that you upload the final author's version of your scientific article to Erasmus Repository RePub from Personal Metis. The full text will be assessed by the university library and supplemented with bibliographic details. It is also necessary to include the DOI of an article in the publication details in Personal Metis.

						÷

Upload your full text in PDF format. If you have questions please contact the university library.

By clicking on the upload button in the start screen with the publication list, a menu will appear enabling data export to RePub. Follow the instructions if you wish to enter your publication on the RePub site that follows.

If the university library has included the publication in the repository, the URL (URL, IR) will be shown in the Metis edit screen at the bottom of the publication. In the consultation screen you can use this icon

to view the uploaded version.

Important: Ensure that the DOI is entered in Personal Metis, before uploading a publication to Repub. Only then, after the assessment and incorporation of the full text in the Repository, a handle will be sent to Personal Metis. This handle will also be clickable in the list of publications on the researcher's people pages.

8. Link to Promas (people pages)

You can connect directly to Promas via Personal Metis, without having to log in again.

• Click on 'Profiles'.
