

Do you have a passion for research? Do you believe in the open, pragmatic, vital and international spirit of Vlerick? And are you ready to explore future challenges in healthcare? Then we have the perfect job for you!

Junior Research Associate Healthcare

What can you expect?

As researcher in the Vlerick Healthcare Management Centre, you will:

- Act as the coordinator of MINOZ, our research platform for Belgian hospitals
- Perform research in the field of healthcare management, in collaboration with faculty and other researchers. This includes more specifically:
 - Desk research (e.g. finding and synthesizing relevant publications)
 - Collecting data/field research (survey, contacting research partners etc.)
 - Analysing data
- Disseminate knowledge by writing papers, reports and articles, social media and present research findings to both business and academic audiences
- Provide support in student projects (guiding students, critical reading etc.)
- Provide support for our teaching activities, both in executive education and in MBA/Master courses

What do we expect from you?

- You have a Master's degree
- You have a research mind-set with a strong interest in the 'real life' business world
- You have good analytical 'number cruncher' skills
- You have a proactive attitude
- You are fluent in Dutch and English. Proficiency in French is a plus.
- You can work autonomously but you are also a good team player
- You have good writing and computing skills
- You are based in our campus in Ghent

Working for Vlerick is

- Autonomy, responsibility and challenging work
- The opportunity to become a content expert
- Interesting contacts with the business world
- A competitive compensation and benefit package

More about the Vlerick Healthcare Management Centre

The Vlerick HMC is a non-profit independent think tank advancing innovative and actionable management and policy solutions in the field of healthcare and life sciences. We aim to foster closer collaboration amongst public and private health system players and generate ideas that have a positive impact on society. We work with leading actors including doctors, hospitals, life science companies, health payers and regulators on finding answers to the big challenges facing the sector.

Learn more about the centre and its activities on www.vlerick.com/healthcare.
