How to use this document

This document provides representative exercises pertaining to some of the important vocabulary and grammar topics taught in each base of the languages currently offered by ELS. This will give you a better idea of the level of proficiency that you can expect to achieve at the end of each base for the language you are interested in learning.

- If you have some background in the language, please work through the exercises of Base 1 and/or Base 2. If you are able to correctly solve the exercises of Base 1, then the language component of the Base 1 lessons may be too easy for you.
- If you are able to solve the exercises of Base 2, then Base 2 lessons may be too easy for you. In this case, Base 3 is the right base for you. If you are able to solve the exercises for Base 1 and find the Base 2 exercises difficult to solve, we advise you to join Base 2.
- Specific directions for each language are provided in the following sections.

The correct answers to all the exercises are available at the end of the document (Specific page numbers for the solutions to the exercises of each language/base are provided throughout the document)
