

VPN connection – with Windows 10

secure connected using Action Center

Quickstart VPN network usage

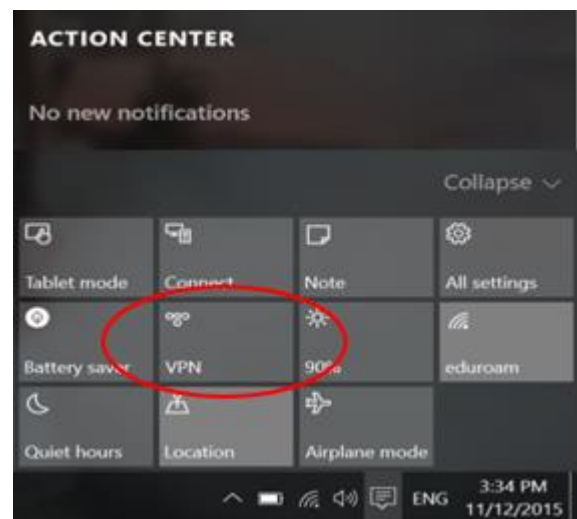

- To create a new VPN network connection:
Open *Action Center / VPN / VPN / Add VPN connection /* name it in *Connection name* with **EUR VPN** and fill in *Internet address*: **vpn-eur-pptp.eur.nl**, provide your full **ErNA-id** account details and password. And to connect, select EUR-VPN and click *Connect*
- To start an VPN connection:
Open *Action Center / VPN / VPN /* select *EUR-VPN* and click *Connect*
Use account details: your personal ErNA-id like erna-id@eur.nl and password.

Step-By-Step: add a VPN network connection using Action Center

1.1. Open Action Center, select VPN

Click on *Action Center* on the *Windows taskbar* next to the clock.

Select from the options shown: *VPN*

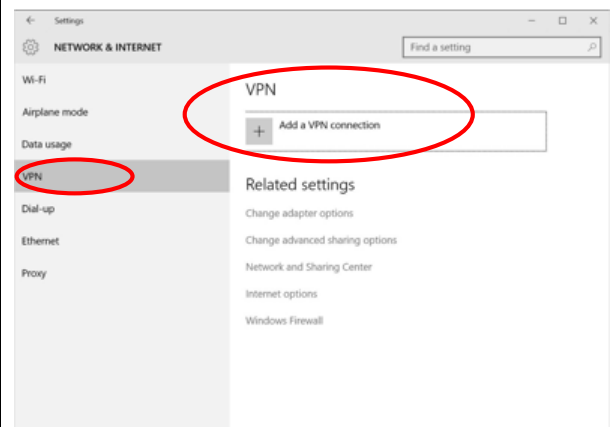

1.2. Open VPN and add a new VPN connection

Your network configuration screen opens.

On the left of this panel, select *VPN*

To add a new VPN connection, click in the right panel the option:

Add a VPN connection

1.3. Add VPN name and server address details

Fill in the required fields:

In field *Connection name*:

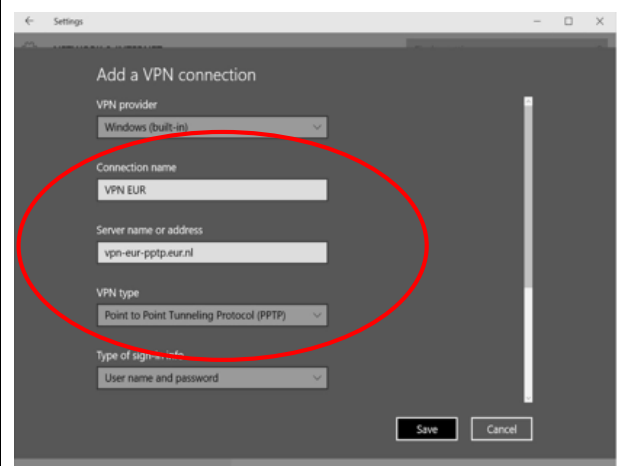

EUR VPN

In field *Server name or address*:

vpn-eur-pptp.eur.nl

In *VPN type* choose option:

Point to Point Tunneling Protocol (PPTP)

1.4. Fill in and save your ErNA-id account details

Next step is to provide your full ErNA-id account details.

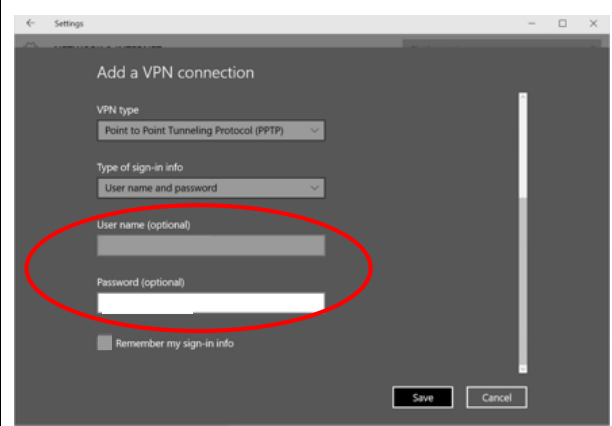

Fill in field *User name (optional)*, like:

erna-id@eur.nl

Fill in field *Password (optional)*:

your password

Click to continue: *Save*

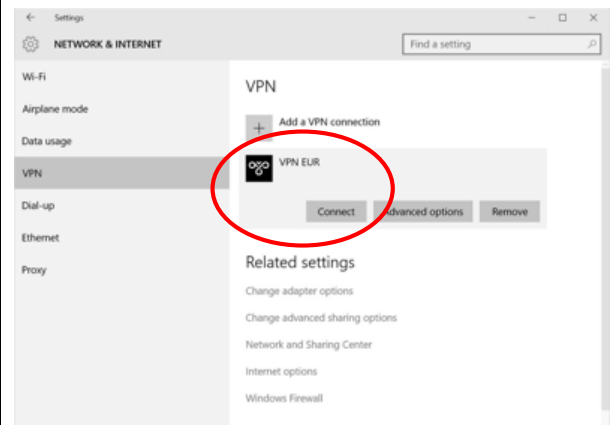

1.5. Select EUR VPN profile and Connect

Click on the newly created VPN connection:

EUR-VPN

And choose to start your VPN connection:

Connect

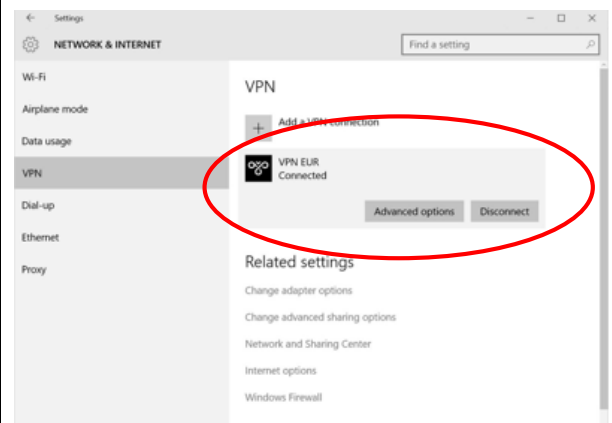

1.6. Connect and disconnect with EUR-VPN

When this VPN network connection using EUR-VPN is properly connected to the campus secure network, below the EUR-VPN option a *Connected* status will be shown.

To disconnect EUR-VPN

This is also the place to disconnect your VPN connection just by selecting:

Disconnect

Using the VPN connection

From *Action Center*, select *VPN*, *VPN* select *EUR-VPN* and click *Connect* to start the VPN connection every next time, just repeat steps 1.5 and 1.6. Likewise to disconnect from EUR VPN, then select *Disconnect*, see 1.6.

Remove VPN connection

To remove the EUR VPN connection:

From *Action Center*, select *VPN*, *VPN* select *EUR-VPN* and choose *Remove* in de lower right corner.
